

VIP Indicators Guide

Welcome To The **VIP** Indicators Guide

This guide will show you how to use the indicators step by step in a simple and powerful way.

Learn how the indicators work

Find strong entry points early

Understand buy & sell signals

Use the indicators with confidence

Whether you are a beginner or an experienced trader, this guide will help you get the most out of your **VIP** Indicators.

VIP Market Scanner™

VIP Market Scanner™

Simple signals. Clear trade plans.

BUY & SELL
signals

Entry, Take Profit
& **Stop Loss**

Works on all
markets &
time frames

Up to **93%**
accuracy

Built for **beginners** and
advanced traders.

Step 1: Wait for a **BUY** signal

When the scanner shows BUY, look for a long trade.

1

Wait for the **BUY** signal

2

Enter the trade

3

Hold toward the target

Simple and clear

Step 2: Wait for a **SELL** signal

When the scanner shows **SELL**, look for a short trade.

1 Wait for the **SELL** signal

2 Enter the trade

3 Hold toward the target

 Easy to follow

Step 3: Follow the trade plan

The indicator helps map out the full setup.

accuracy

Entry, Take Profit
& Stop Loss
included

One indicator. **Multiple opportunities.**

VIP Market Prediction Indicator™

How To Use The VIP Market Prediction Indicator™

Simple future price projections to help spot potential entries early.

Works on
all markets

Works on
all time frames

Easy **bullish** &
bearish signals

Clear direction

Early setups

Easy to follow

Spot A **BUY** Setup

Go long when the projected path points up and the trend box says *Bullish*.

Prediction line
points up

Trend box
= Bullish

Look for a
long entry

Simple idea: enter near the start, secure profit at **TP1**, and let **TP2** target the bigger move.

Spot A **SELL** Setup

Go short when the projected path points down and the trend box says **Bearish**.

Prediction line
points down

Trend box =
Bearish

Look for a
short entry

Simple idea: enter near the start, take some profit at **TP1**, and aim for **TP2** if the move continues.

Use The Projection To Plan The Trade

The forecast line gives you a simple map for entry, targets, and risk.

1 **Entry:**
near the start
of the move

2 **TP1:**
first target

3 **TP2:**
final target

4 **Stop Loss:**
below the setup

For **sell** trades, flip the same idea in reverse.

Keep It Simple

A few **easy rules** can help you **get the most** from the indicator.

- ✓ Use it on any market
- ✓ Use it on any time frame
- ✓ Keep the settings on default
- ✓ Only trade when the projection and trend box agree
- ✓ Many traders like clearer setups from 30m to 4H
- ✓ Exit at your target

Easy to use

Works on
all markets

Helps spot
entries early

Simple rules. **Clear direction.** Better trade planning.

Cloud Band Signals™

VIP
INDICATORS

Cloud Band Signals™ Made Simple

Spot high-probability buy & sell setups early

Easy to read

Works on
any market

Helps find
early entries

VIP
INDICATORS

How To Take BUY Trades

Simple long-entry guide

4 Take profit near the red band

3 Place stop loss below the buy zone

2 Best entries are near the green band

1 Wait for a Buy label

BONUS TIP:
Best when the trend is bullish

Easy long entries

Catch moves early

Clear target zones

VIP
INDICATORS

How To Take SELL Trades

Simple short-entry guide

BONUS TIP

Best when the trend is bearish

Easy short entries

Spot reversals early

Clear target zones

Use Trend + Bands Together

The simple confirmation method

Bullish Setup

- ✓ Trend says Bullish
- ✓ Look for Buy labels
- ✓ Entries near the green band are strongest

Bearish Setup

- ✓ Trend says Bearish
- ✓ Look for Sell labels
- ✓ Entries near the red band are strongest

Best Simple Routine

1

Check trend

2

Wait for signal

3

Use the opposite band as your target

Beginner friendly

Works on any timeframe

Helps filter weaker trades

Alerts + Trade Management

Let the indicator do the hard work

1 Set alerts for Buy and Sell signals 

2 Enter when a clear signal appears 

3 Use the opposite band as your take profit 

4 Exit at target or when your stop is hit 

Works on forex, crypto, stocks and more

 Saves screen time

 Good for all markets

 Helps you stay disciplined

VIP Support & Resistance Matrix™

How It Works

Support & Resistance Matrix™

Shows key price zones instantly

Helps spot early entry areas

Works on any market & timeframe

Simple to read. Easy to use.

Buy Setup

Use **support** for early entries

Helps you catch clean **buy entries** early.

Sell Setup

Use **resistance** for strong sell trades

Helps you find **clearer sell** opportunities.

Breakout Moves

When **key levels break**, momentum can follow

Break above
resistance =
bullish breakout

Break below
support =
bearish breakdown

Wait for
a clean break

Follow the
direction of
the move

Use the next
zone as your
target

Simple breakouts can lead to **strong moves**

Simple Rules

5/5
FINAL SLIDE

A quick checklist before every trade

1

TREND

Bullish ▲

Check the
trend box first

2

Buy at support
in bullish trends

3

Sell at resistance
in bearish trends

4

Take profit at
the next zone

Best used on
15m to 4H

Works on
forex, crypto
& stocks

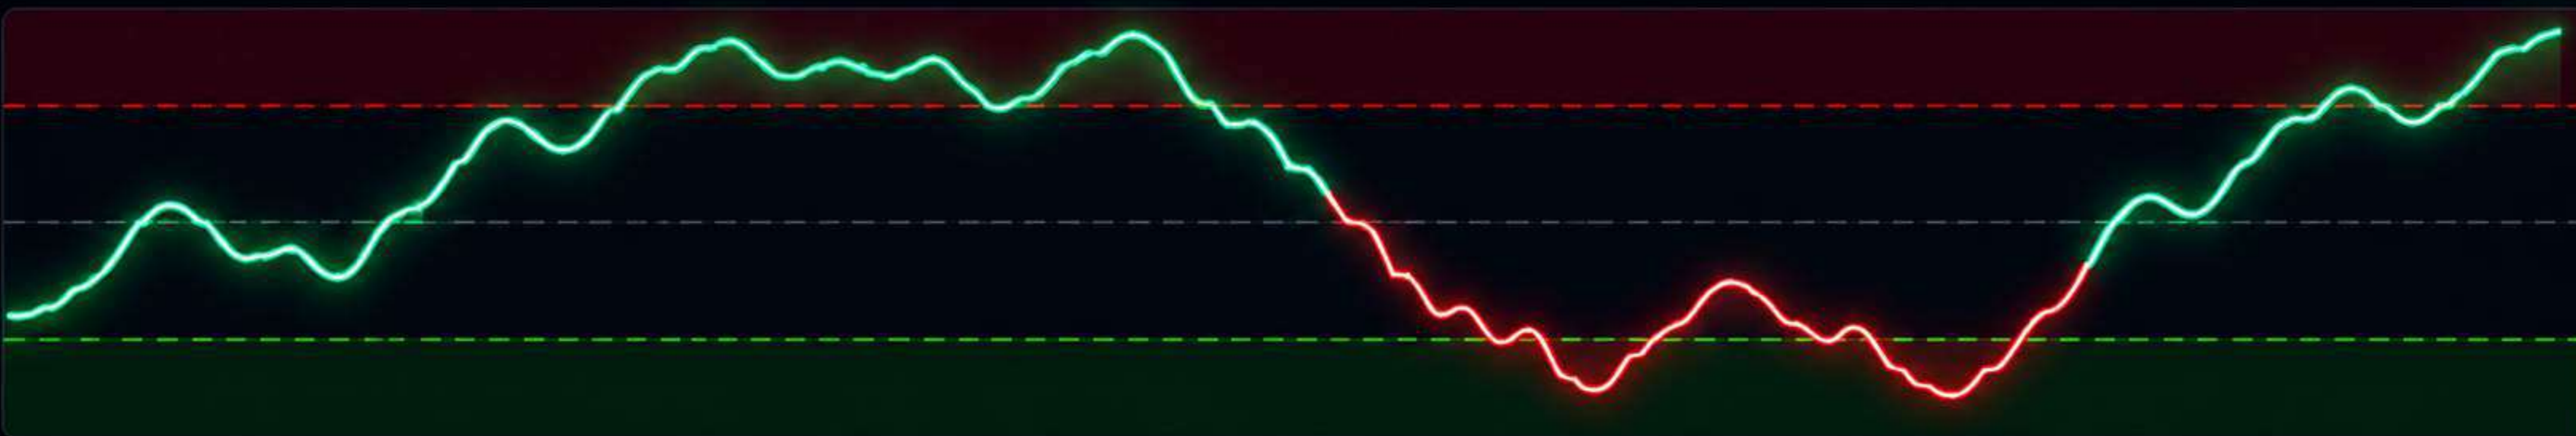

Default
settings work
great

Clear zones. Clear entries. Easy decisions.

Trend Navigator & VIP Oscillator™

VIP
INDICATORS

How To Use Trend Navigator & VIP Oscillator™

Simple signals. Early entries. Clear trend direction.

1. Find good entry points **early**

2. **Green** = bullish | **Red** = bearish

3. **Buy** & **sell** alerts built in

4. Works on forex, stocks, crypto & more

Up to
93%
accuracy

Easy
to use

VIP
INDICATORS

1. Follow The **Trend** First

Trade with the color of the line.

Green line =
bullish trend

Focus on
BUY trades

Red line =
bearish trend

Focus on
SELL trades

Trading with the **trend** helps you avoid weaker signals.

VIP
INDICATORS

2. Enter On The **Signal**

The indicator helps you spot good entries early.

BUY SETUP

- ✓ Green trend line
- ✓ **Buy** label appears
- ✓ Look for the move **up**

SELL SETUP

- ✓ Red trend line
- ✓ **Sell** label appears
- ✓ Look for the move **down**

Best entries happen when the **signal** matches the **trend**.

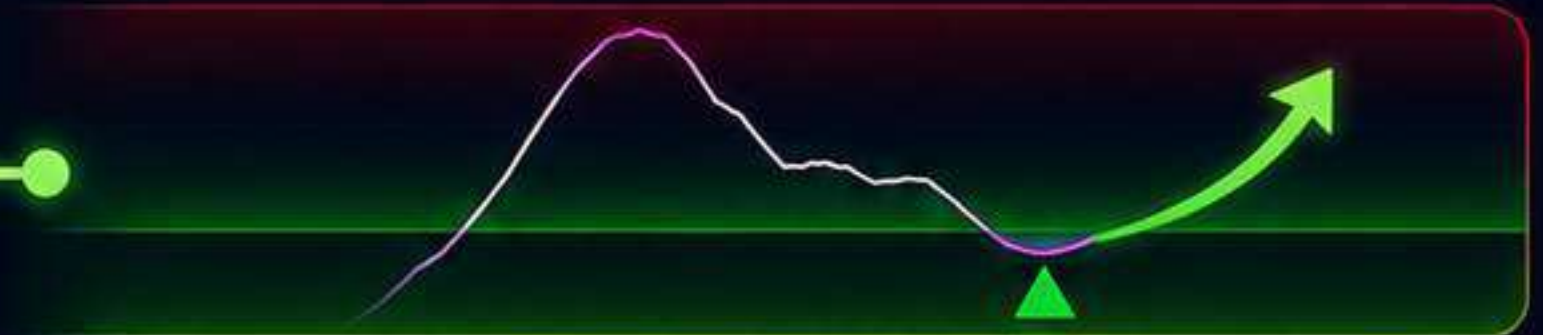

3. Use The Oscillator To Confirm

Extra confirmation can help filter weaker trades.

Oscillator turning up from the **lower zone** can support **BUY** ideas

Oscillator turning down from the **upper zone** can support **SELL** ideas

Trend + signal + oscillator = **stronger setup**

4. Manage The Trade **Simply**

Keep it **simple** from **entry** to **exit**.

1 Enter near the **buy** or **sell** signal

2 Place your **stop** beyond the recent swing

3 Take **profit** at your target

4 You can also **exit** when the trend line **changes color**

Default settings
work well

Works on
any market

Any
timeframe

Alerts can help
you stay ready
